### \$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution, and assisting nature in doing its work. The proprietors have so

much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. E. J. CHENEY & Co., Toledo, Ohio. Testimonials sent free. Price 75c. per bottle. Sold by all Druggists. Take Hall's Family Pills for Constipation.—Adv

## SPECIAL MEETING FOR THE YOUNG BY

Evangelist Layfield

At the Presbyterian Church Sunday morning.

Something worth seeing and hearing.

Everybody Welcome

### Dictagrams

We have great confidence in people who agree with us.

And the politician who tells you what you would like to believe may be very shrewd but beware of him lest his shrewdness be at your own expense.

Birds of a feather may flock together, but when the feathers are separated from the bird and turned loose on the four winds of heaven they simply flock over town. Burn 'em.

The old saying, "from head to foot," is reversed by Mr. Shoemaker, of Centralia. He is a dentist.

What's in a name? Perhaps Mr. Thyfault wouldn't lay it to anyone else. Mr. Snapp is a photographer, and presumably he is willing to take that kind of a shot at most anybody. And I wonder if Oberlin is an Irish town. Some of the papers print it O'Berlin.

Perhaps there is nothing in a name. Ben Gump said there wasn't otherwise he would of been a dunce, indeed. But then I remember that Mr. Gump was the drollest man I ever knew.

As the holiday season comes on there will be more or less activity displayed in store windows, fixing them up in attractive shape to catch the holiday trade. It is a commendable thing, of course, but why stop with store windows? Why not apply the same treatment to the windows of shops and offices, for the sake of appearances, and why is not every day in the year a good clean-up day?

And there comes in the other old saying: Sweep your own doorstep first. Let's all plead guilty.

The reporter said that the lecturer "spoke straight from the shoulder." Perhaps his face was out of commission that day.

If you ask the average man a question about some event of local history which may have happened twenty years ago he will give you an evasive, uncertain and unsatisfactory answer. On the other hand if you make a positive statement about it yourself there will be forty fellows ready to declare that your statement is absolutely wrong.

Up among the Wolverines every well equipped farm is provided with a manure spreader and I discovered that many farmers were buying commercial fertilizers. They need to make the most possible profit out of farm land that costs from sixty to two hundred dollars per acre.

"The Devil and the Turk" will be one of the subjects discussed this season on the Luray lecture course. I would use or as the connecting word.

Mrs. H. S. Givier visited friends in Hays this week.

## PULLMAN A SYNONYM FOR LUXURY

\$740 f. o. b. Factory

Synonymous of luxury, comfort and sturdiness in railway travel for more than half a century, the name Pullman has today an equal significance in the motoring world. It was in 1861 that George Mortimer Pullman built the first Pullman railway car at a cost of \$18,000.

With an ambition to produce an automobile worthy of that name, the manufacturers of the Pullman automobile have for many years been perfecting their product to a high standard of excellence. Their first model cost far more than the first Pullman Palace car—for nothing was adopted that did not measure up to their ideals of perfection in motor car construction. Each year has seen added improvements and refinements and a general trend in price reduction resulting from the elimination of experimental work, the wiping out of original overhead expenses, and from wider manufacturing experience.

In response to a popular demand for a low-priced car of quality, last year, the company brought out the famous Pullman for \$740. It was an instantaneous success. Nothing like it has ever been offered before. Nothing approaching it has been produced since. There was an immediate effort by some manufacturers to duplicate the Pullman price and standard. But an examination of the specifications of these cars, their size and body capacity, finish and general construction leaves the Pullman standing in a class by itself.

For 1916 the Pullman Company have gone beyond its expectations. Superior as last year's model was, the new car has set another new standard in size, roominess and mechanical superiority, and at the same price—\$740.

## MONUMENTS

From time immemorial it has been the costume of the people to erect a monument for their dead as a symbol of love and affection. But a monument badly selected, poorly executed and of inferior material is worse than an unmarked grave. Therefore you want the very best.

Our Mr. Richmond's 45 years experience in monument business gives him that positive knowledge to help you select what is best and he will advise you what will be most suitable for your cemetery lot.

We have erected some of the best and largest monuments in your cemetery and it is a great pleasure to have among our customers some of the best people in your community.

We are now taking orders for monuments to be delivered next spring and we hereby respectfully solicit your patronage. Send us a postal card and we will come to see you. Our work is the best and our prices are very reasonable.

Respectively,

## Teachers' Column

graph calling the noble profession of teaching a "Disease!" And an incurable disease at that. We protest most vociferously and ask redress of grievances.

"A good name is rather to be chosen than great riches and a loving favor than silver or gold."

"No better work than hers is done Beneath the good old shining sun—The Kansas school ma'am!"

—Walt Mason.

Here we are back again after our brief vacation period, the first taken in three years of our strenuous labors. During that time the State Teachers' association was taken in and educational friends visited and consulted over a stretch of territory from the state university at Lawrence to the Colorado line, the Sharon Springs High school.

And we find in our absence Dicta-

graph calling the noble profession of teaching a "Disease!" And an incurable disease at that. We protest most vociferously and ask redress of grievances.

The State Teachers' association grows greater and better every year. We enjoyed the program as never before and as to the attendance good authorities report from 6000 to 7000 teachers present. It really seemed 10,000 to us as we stood for hours in front of the crowded auditorium waiting in vain for an opportunity to force an entrance. It seems that Topeka ought to make an effort to erect some sort of a structure that all might have the benefits of the general meetings.

Some of us were beautifully cheated out of enjoying the Fort Hays Nor-

mal banquet. After careful inquiry we learned that the banquet would be held Friday noon as formerly. When we arrived eager and happy to meet all old friends, imagine our consternation at the sea of strange faces of dignified looking men, for only six women were present. However our luck again aided us and Prof. VanVorhis, head of the science department at the Kansas State Normal school and one of our favorite teachers there, greeted us heartily and urged us to stay with the chemistry people banquet, and seldom has it been our opportunity to listen to more delightful scientific "firing." Dr. G. W. Stewart of the University of Iowa was especially brilliant. The Fort Hays Normal banquet had been held Thursday evening.

And that evening, blissfully ignorant of the banquet, Miss Lulu McKee our popular story teller of last Institute searched us out from the surging throngs and we hastened with her to hear Dr. Schwegler lecture at the Topeka High school. Dr. Schwegler gives two lectures a week to the Topeka teachers the University giving them two hours credit for the winter's lectures. Each teacher pays \$5.00 enrollment. We were pleased to think our teachers at home were entering on some such cultural plan with the Fort Hays Normal school this year.

Dr. Schwegler to our mind is head and shoulders above every other child psychologist with whom we have come in contact—even in person or through his works. He endeavored to explain how every unfulfilled wish or desire causes a psychic pressure which sooner or later in some form manifests itself, the form depending on temperament and training of the individual. As an example he gave "Susan and John sitting on the front porch on Sunday evening." John wishes he could stay there always but it is growing late, he thinks of the neighbors' talk, etc., and reluctantly tears himself away. His unfulfilled wish to stay causes a psychic pressure which unknown to him the mind seeks to relieve. He despises poetry yet as he sits alone in his room brooding over his banishment, unconsciously his hand begins writing poetry. The psychic energy had been dramatized, refined and transformed. "The more noble and refined the individual the more refined the transformed energy will manifest itself!" Dr. Schwegler using many other illustrations. Dreams also are but dramatizations of these suppressed wishes the mind attempting to create that state of satisfaction which subconsciously it realizes conditions will not permit the waking state.

At close of the lecture a question period followed. The discussions were invaluable to all students of child psychology. We were pleased to hear Dr. Schwegler declare emphatically that all persons are highly prone to suggestions, regardless of sex, age or station. Several years ago it was the popular theory that only the young and ignorant, children and women, were good subjects for suggestions. Now it seems the more highly educated, the more sensitive the individual the greater his capacity for acting on suggestions. However that may be "suggestion" in the hands of a wise teacher is a powerful aid to imparting knowledge and to discipline. Our program committee will attempt to secure a good lecturer on this subject for one of our teachers' meetings.

The Golden Belt district was the banner district for attendance of county superintendents at the state association. Superintendent Miss Rose Gilbert of Wallace county, Supt. Malcomb Peterson of Logan, Supt. Chas. Wilson of Gove, Supt. Louis Christensen of Ellis, Supt. C. A. Bodmer of Russell, got the best to be had out of the many excellent lectures, roundtables, banquets, etc., held during the three days' meeting. Out of the 105 county superintendents in the state 60 were in attendance, probably the same sixty that attended the county superintendents' convention at Manhattan last summer. It seems the more conventions one attends the more he wants to attend.

Trego county's motion pictures of Common School commencement held last August were shown at the state censor theater on Kansas avenue in Topeka during the association. Mr. C. D. Yetter hailed us in the capitol building with a delightful compliment on the youngsters in the "Movies." He said his little girl shouted with pleasure at the sight of her many Wa-Keeney friends in the pa-
